**QUALITY**

## **Products made by RGL Electronics, just for you!**

RGL Electronics is a leading manufacturer of access control products that has been serving the security industry for over two decades. With a reputation for delivering high-quality solutions, RGL embarked on a strategic initiative to provide Original Equipment Manufacturer (OEM) products to specific customers. This case study explores how RGL Electronics partnered with a select clientele to help them grow their businesses through bespoke power supplies.

### Customized OEM Products:

1. Expanded Product Range: With the introduction of RGL Electronics' OEM products, our client was able to offer a wider range of access control solutions, attracting new customers and increasing revenue.
2. Enhanced Reputation: The consistently high-quality products provided by RGL Electronics improved their reputation, leading to increased customer trust and loyalty.

*A plethora of benefits with OEM products, over off the shelf solutions:*

### 1. Customised OEM Products

RGL collaborated with their client to develop customized access control power supplies tailored to their specific products and requirements.

### 2. Compliance

RGL worked closely with their client to design products that met the strict security compliance requirements of government and corporate clients.

### 3. Quality Assurance ISO9001-2015

To ensure product quality, RGL implemented stringent quality control and conducted thorough testing of each OEM product to ensure reliability.

### 4. Scalability

RGL offered scalable access control solutions that could be easily integrated into their existing systems. Providing solutions for their current needs

### Project Conclusion

RGL Electronics successfully partnered with client to offer OEM access control products that helped them overcome their unique challenges. By providing customized, high-quality, scalable, and compliant solutions, we can empower our client and establish themselves as market leaders. This case study exemplifies the benefits of strategic partnerships and tailored solutions in the OEM sector.
